SAURABH GUPTA

Full Stack Developer • Angular • .NET • Azure

+91 8109807814 | saurabhgupta7814@gmail.com | Ahmedabad, Gujarat

LinkedIn | GitHub | Portfolio | YouTube: Tech Tutorials Channel

PROFESSIONAL SUMMARY

Full Stack Developer with 1.5+ years of production experience in Angular, .NET Web API, and Azure — building secure, scalable enterprise applications with JWT, Webhooks, GraphQL, Docker, and Azure Cosmos DB. YouTube content creator covering modern web technologies. 900+ DSA problems solved. Seeking a high-impact role with greater technical ownership.

WORK EXPERIENCE

Tech Extensor Pvt. Ltd. | Associate Software Developer *Ahmedabad, Gujarat • Oct 2024 – Present*

- Engineered scalable Angular + .NET Web API modules integrated with SQL Server, Azure Cosmos DB, and Azure services, contributing to a platform serving enterprise clients across multiple business verticals.
- Implemented JWT-based authentication and role-based authorization across multiple API endpoints, strengthening application security.
- Integrated Webhook event listeners to enable real-time third-party service communication, reducing manual data sync overhead.
- Reduced deployment friction by implementing CI/CD pipelines via Azure DevOps, streamlining release cycles across environments.
- Collaborated closely with QA in agile sprints to identify and resolve bugs, maintaining high code quality across biweekly delivery cycles.

Netlink Software Pvt. Ltd. | Frontend & Java Developer Intern *Bhopal, M.P. • May 2024 – Jun 2024*

- Built reusable React components with Tailwind CSS that improved UX consistency and reduced front-end development time.
- Implemented dynamic data visualizations using Rete.js, enabling intuitive node-based workflow interfaces for end users.
- Delivered biweekly sprint demos and integrated RESTful APIs in an agile team environment.

KEY PROJECTS

ReSaleHub — Used Product Marketplace — *ASP.NET Web API · Angular · SQL Server · Azure | Client Project*

- Built a full-stack marketplace platform enabling users to list, search, and filter second-hand products by category with image upload support.
- Secured the platform using JWT authentication with refresh token flow, ensuring stateless and scalable API access control.
- Designed RESTful API endpoints for product CRUD operations, integrated with Azure Blob Storage for media handling.
- Deployed on Azure with a focus on performance and scalability; integrated Webhook notifications for buyer/seller event triggers.

GoalTracker — Daily Goal Tracking App — *ASP.NET Web API · Angular · SignalR · Hangfire* GitHub

- Built a full-stack productivity app that helps users track daily goals by logging an evening rating, promoting consistency and discipline over time.
- Implemented real-time progress updates using SignalR (WebSockets), so goal status reflects instantly across all active sessions without page refresh.
- Used Hangfire for background job scheduling to send automated daily reminders and generate weekly performance summaries.
- Designed a clean Angular UI with goal history views, rating trends, and streak tracking to keep users motivated and accountable.
- Built RESTful API with .NET Web API following clean architecture principles; data persisted in SQL Server.

TECHNICAL CONTENT CREATION

YouTube Channel — Developer Tech Tutorials YouTube Link

- GraphQL — Core concepts, query structure, mutations, and integration with REST backends.
- JWT Authentication — Token lifecycle, access/refresh token strategy, and secure storage best practices.
- Browser Storage — LocalStorage vs SessionStorage vs Cookies: use cases, limitations, and security considerations.
- Webhooks — Event-driven architecture, payload handling, and real-world integration patterns.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C#, Java, C/C++, HTML5, CSS3, SQL

Frameworks & Libraries: Angular, ASP.NET Web API, React.js, Node.js, Express.js, SignalR, Tailwind CSS, Hangfire

API & Auth: REST APIs, GraphQL, JWT Authentication, Webhooks, OAuth2

Databases: SQL Server, MongoDB, Azure Cosmos DB

Cloud & DevOps: Microsoft Azure, Azure DevOps, Docker, CI/CD Pipelines, Git, GitHub, Linux

Concepts: Data Structures & Algorithms, Agile/Scrum, OOP, MVC, Clean Architecture

ACHIEVEMENTS & LEADERSHIP

- 900+ DSA problems solved across LeetCode, HackerRank, and CodeChef — demonstrating strong algorithmic thinking.
- 2× Smart India Hackathon (SIH) Participant — national-level government innovation challenge.
- State-Level Hackathon Finalist at BIST Bhopal — top performer among regional competitors.
- President, Waste to Wonder Club — led eco-driven technical initiatives and managed a cross-functional student team.
- NSS Best Effort Volunteer Medal — recognized for outstanding community service at the national level.

EDUCATION

B.Tech in Computer Science Engineering *Jun 2021 – May 2025*

Bansal Institute of Science & Technology, Bhopal (M.P.) • CGPA: 8.0 / 10

CERTIFICATIONS

- Cloud Computing & Cyber Security — Microsoft & LinkedIn Learning
- MERN Stack Development & C Programming — Sheryians Coding School
- NSS 'B' Certificate — Government of India
